UPDATE 2-Russia says grain export ban not on the agenda

Fri Sep 5, 2014 12:00pm GMT

* Ministry denies sending grain export ban proposal to PM

* Copy of letter seen by Russia's Grain Union, Reuters

* Deputy PM says issue not on the agenda (Recasts with government comment, adds details, quotes, context)

By Polina Devitt and Darya Korsunskaya

MOSCOW, Sept 5 (Reuters) - Russia, one of the world's largest wheat exporters, said on Friday it was not considering grain export curbs as an option to balance domestic demand during the 2014/15 marketing season.

Arkady Zlochevsky, head of Russia's Grain Union, said earlier that Russia's Agriculture Ministry made such a proposal in a letter addressed to Prime Minister Dmitry Medvedev. Reuters also obtained a copy of the letter, dated Aug. 26.

"The issue is not on the agenda," Deputy Prime Minister Arkady Dvorkovich was quoted as saying by Itar-Tass news agency on Friday.

Dvorkovich's spokeswoman Aliya Samigullina told Reuters the government was not considering grain export restrictions as it would only use market methods of regulation.

Samigullina said the letter from Agriculture Minister Nikolai Fyodorov to Medvedev included a list of options related to monitoring the grain market situation, not proposals.

Russia shocked grain markets with a one-year export ban in 2010 when drought ravaged that year's harvest. The move was a catalyst for a rise in grain prices and political instability in the import-dependent Middle East and North Africa.

Russia limits poultry imports from U.S.

Dec 10 (Reuters) - Bunge Ltd, one of the world's largest agricultural trading houses, sees no signs that Russia will limit wheat exports as some traders have feared, the company's managing director of global agribusiness said on Wednesday.

"Today we have not seen any intervention and we have no signs that anything is about to happen," Brian Thomsen, who leads Bunge's agribusiness operations, said in a webcast of a company

GRAINS-Wheat hits 6-month high on Russia worries; soy, corn firm

Thu Dec 18, 2014 3:50am IST

- * Wheat soars 4 percent on fears of Russian export slowdown
- * Corn higher on strong U.S. ethanol output
- * Soy firm, led by meal; South American crop prospects cap gains

(Adds details, closing prices)

By Julie Ingwersen

CHICAGO, Dec 17 (Reuters) - Chicago Board of Trade wheat futures surged 4 percent on Wednesday, rising for a fifth straight session on worries that Russia, a key global supplier, might restrict exports to cool domestic prices, traders said.

Strong U.S. ethanol production bolstered corn, while soybeans firmed on technical buying.

CBOT March wheat settled up 25-1/4 cents at \$6.48-1/2 per bushel, after reaching \$6.50-3/4, the highest spot price on

Ukraine: Winter grains acreage

Source: Ukraine Ministry of Agrarian Policy and Food

5 years average winter wheat share in winter grains acreage is 81%

Ukraine: winter grains condition was significantly below average
(NDVI: 11/01/2014 - 11/16/2014)

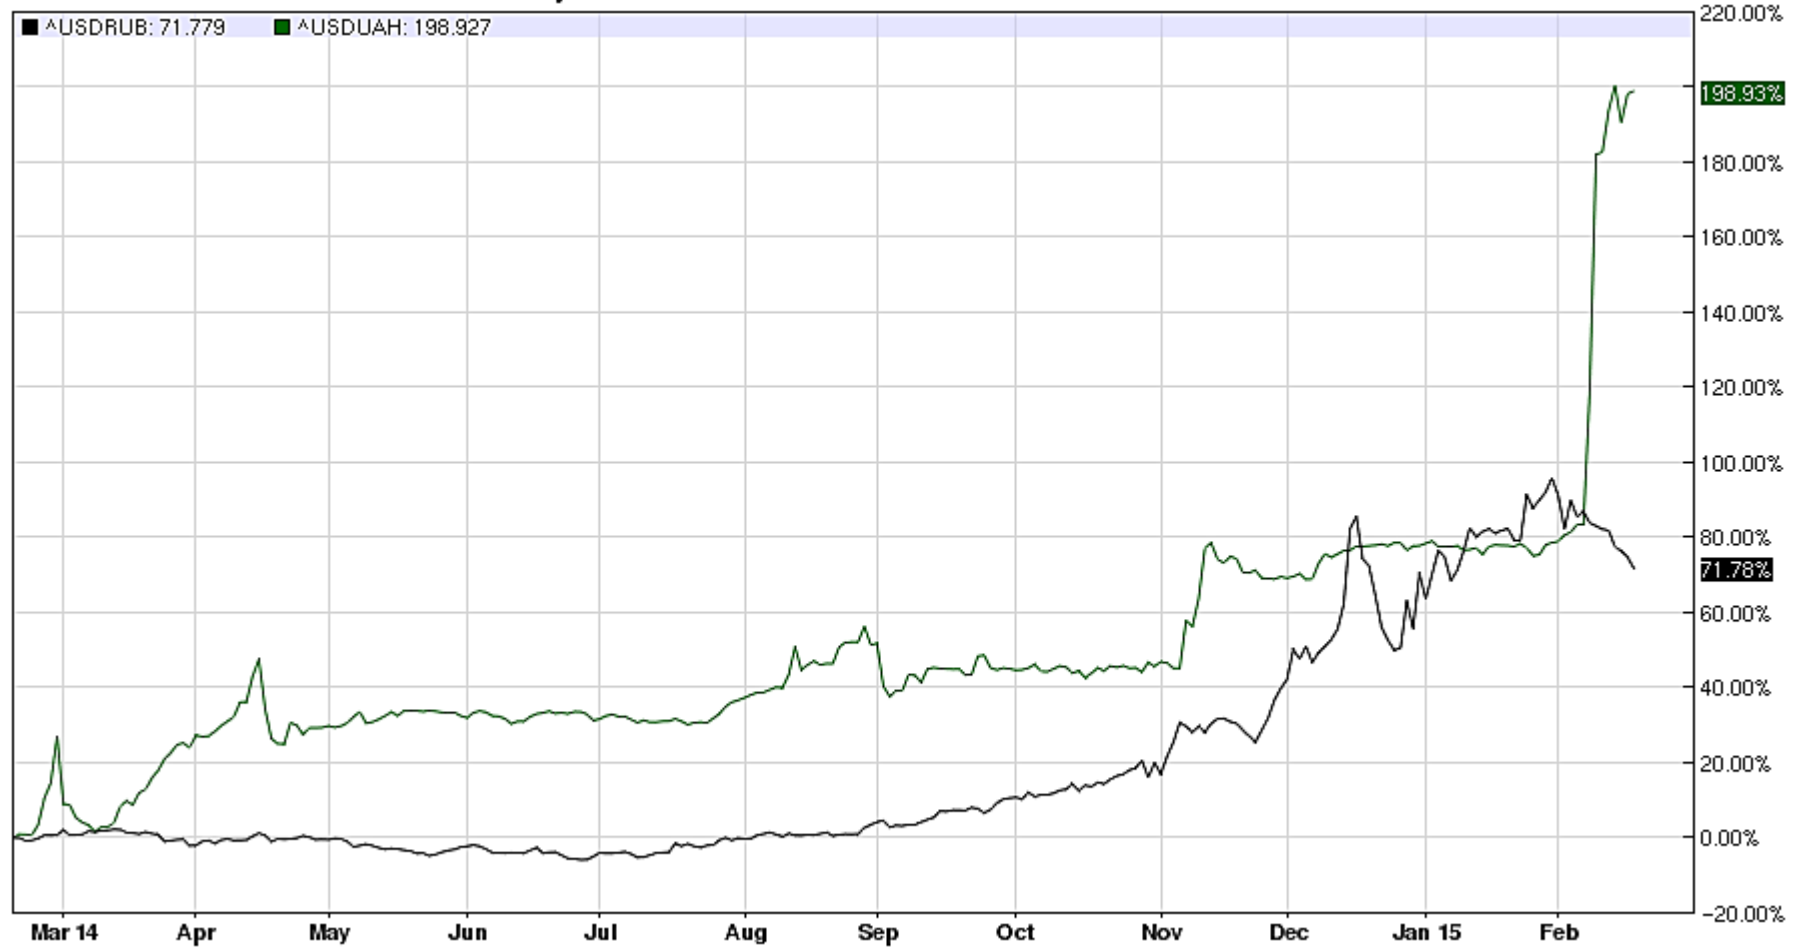

2015 early estimates

- Russia grain production sharply down. Total grain crop 85-92 mmt (104), wheat 47 – 53 mmt (59)
- 2015/16 grain exports 16-20 mmt (29), wheat 13-17 mmt (21)
- Ukraine grain production significantly down (-10 mmt or more from 64 mmt), sharp decrease of corn crop
- Kazakhstan generally unch. 15-18 mmt (17)
- **Bottom line: less wheat exports from the region (30 mmt or below compared to 38 mmt in 14/15), significantly less corn exports (10-13 mmt vs 21 mmt in 14/15)**

Ruble & Hryvna devaluation

^USDRUB - U.S. Dollar/Russian Ruble - Daily Line Chart

Longer term prospects

- **Challenges**
- FX rates and cost of ag inputs (2016 crop)
- State regulation
- (Geo)Political stability
- State support
- **Opportunities**
- Land availability (RU: \$120-320/acre of good farm land); 30 mln ha were taken out of cultivation since 1980's;
- Increasing competitiveness, part of costs in \$ terms are significantly down
- Developed export infrastructure, esp. in Ukraine
- Presence in many large & growing markets

Bottom line: 2 challenging years ahead!

Return to longer term growth trend in 2017?
